

Emerson Licensing Management Software

IMPORTANT PRODUCT INFORMATION (IPI)
Version 2.1.73

Warnings and Caution Notes as Used in this Publication

WARNING

Warning notices are used in this publication to emphasize that hazardous voltages, currents, temperatures, or other conditions that could cause personal injury exist in this equipment or may be associated with its use.

In situations where inattention could cause either personal injury or damage to equipment, a Warning notice is used.

CAUTION

Caution notices are used where equipment might be damaged if care is not taken.

Note: Notes merely call attention to information that is especially significant to understanding and operating the equipment.

These instructions do not purport to cover all details or variations in equipment, nor to provide for every possible contingency to be met during installation, operation, and maintenance. The information is supplied for informational purposes only, and Emerson makes no warranty as to the accuracy of the information included herein. Changes, modifications, and/or improvements to equipment and specifications are made periodically and these changes may or may not be reflected herein. It is understood that Emerson may make changes, modifications, or improvements to the equipment referenced herein or to the document itself at any time. This document is intended for trained personnel familiar with the Emerson products referenced herein.

Emerson may have patents or pending patent applications covering subject matter in this document. The furnishing of this document does not provide any license whatsoever to any of these patents.

Emerson provides the following document and the information included therein as-is and without warranty of any kind, expressed or implied, including but not limited to any implied statutory warranty of merchantability or fitness for particular purpose.

Introduction

Emerson provides cloud services to allow end-users to manage their investment in Machine Automation Solutions software. These services start with the fulfillment of the ordered software where an end-user receives an email on how to download the ordered software and activate it. End-users can use services to download the ordered software anywhere in the world – no need to wait for software to be delivered by mail. Once installed, the cloud services allow end-users to activate the entitled software. Services are flexible to allow software activation on devices that are connected to the internet or not connected to the internet.

Minimum Requirements

Specification	Description
Operating Systems	- Microsoft® Windows® Server 2016 (1607) - Microsoft® Windows® Server 2019 (1809) - Microsoft® Windows® Server 2022 (21H2) - Microsoft® Windows® Server 2025 (22H2) - Microsoft® Windows® 10 (22H2) - Microsoft® Windows® 10 IoT Enterprise LTSC (1809) - Microsoft® Windows® 11 (22H2 and 25H2)
Disk Space	1 GB
Memory	2 GB
<i>Other System Requirements</i>	
Installation Requirements	ELM software must be installed on the same physical machine as the application hardware key. ELM software must be installed on the same virtual machine as the application when using a hardware key. (Software key not accepted.) CAUTION: To avoid potential conflicts, it is strongly advised to install ELM and PLSA on separate machines.
Online Activation/Return of Licenses	Automatic activation and return of licenses will require internet access. The user will need configure HTTPS protocol on TCP port 443.

Revision History

Version	Date	Description
Version 2.1.73	Mar 2026	Fixed compatibility issues with Windows 11 25H2 or later.
Version 2.1	Dec 2025	Documentation update: Updated compatibilities in the Operating System section and added a cautionary note to the Installation Requirements Section.
Version 2.1	Oct 2025	What's New in ELM Version 2.1 1. Smarter License Visibility

Version	Date	Description
		- View available lease licenses on a server using the server hostname or IP address — powered by RMS out-of-the-box API. (<i>Available Licenses on Server screen</i>) - See leased licenses per machine using RMS API for complete transparency. (<i>Leased License on Machine screen</i>) 2. Flexible Lease License Operations - Create lease licenses with a custom duration and support for UUID-based locking. (<i>Available Licenses on Server screen</i>) - Renew or end leased licenses easily through the Leased License on Machine screen — no manual workarounds needed. 3. Built-In Licensing Documentation Access the official Software Licensing Reference Architecture PDF directly within ELM by clicking the info icon — always up to date and at your fingertips. 4. System Maintenance & Cleanup Perform a full license cleanup across ELM for better control and hygiene of your license inventory. 5. Usability Improvements - Copy and paste device names and locking codes directly from the Device Information tab — streamline your workflow. - Refresh the Computer Locked tab grid to ensure you're always working with the latest data.
Version 2.0	Jan 2024	- Serial numbers and part numbers are now included in computer-locked licenses and hardware key licenses. - The server applications now allow users to find leases licenses by IP address - Client application (i.e., ELM) now retain the last entered license server information. - Added fixed heights and widths to certain tabs in the UI.
Version 1.5	Feb 2023	- ELM no longer needs to be run as an administrator to access leased licenses. - ELM 1.5 introduced auto renew functionality to renew leased licenses automatically. - Added status symbols to denote how long a leased license has remaining before expiration. - Parts of the UI now operate using fixed heights and widths to prevent overlap in smaller windows. - Order numbers are now visible in the Computer Locked and Hardware Key Grid.

Version	Date	Description
Version 1.3	Feb 2022	- License refresh can be performed through Entitlement and License Manager. - Automatic Refresh - PC's with an internet connection can refresh Emerson software licenses. - Manual Refresh - Licenses on PC's without an internet connection can be manually refreshed by downloading the updated license file from the Customer Center portal. - ELM now has a more intuitive user interface that shows users what licenses are installed and their status. - Hardware key-based licensing reflash is now supported for PAC Machine Edition 9.8 software product through the Entitlement and License Manager. - Contextual help access allows users to find information more conveniently. Information on the device information that the license is bound to is readily available so that tracking licenses between the Customer Center portal and the device that they are deployed on is possible.
Version 1.2	Mar 2021	- Hardware key-based licensing now supported for PAC Machine Edition 9.8 SIM 6. - Device names can now be customized at the time of activation - Automatic activation – PCs with an internet connection can activate Emerson software licenses with computer name Manual activation – Licenses on PCs without an internet connection can be activated with the computer host name.
Version 1.1	May 2020	- Self-service license returns are now available through the Entitlement and License manager - Automatic return – PLCs with an internet connection can return Emerson software licenses directly to the Emerson cloud. Manual return – Licenses on PCs without internet connection can be returned via two-step process.

Release Notes

Version 2.1 of ELM includes quality of license updates and some new features. Some of these involve simple UI updates and others impact the ability to manage licenses.

Entitlement and License Manager

Functional Compatibility

Subject	Description
Programmer version requirements	PAC Machine Edition 9.80 SIM 6 or later is required to support Hardware License Key use. Note: This support does not extend to PPS or PCM.
Non-Supported Operating Systems	Dropped support for the following operating systems: • Microsoft® Windows® XP • Microsoft® Windows® Server 2003 • Microsoft® Windows® Server 2008 • Microsoft® Windows® 7
Supported Operating Systems	• Microsoft® Windows® Server 2016 (1607) • Microsoft® Windows® Server 2019 (1809) • Microsoft® Windows® Server 2022 (21H2) • Microsoft® Windows® Server 2025 (22H2) • Microsoft® Windows® 10 (22H2) • Microsoft® Windows® 10 IoT Enterprise LTSC (1809) • Microsoft® Windows® 11 (22H2)
Supported Environment	• Type 1 (vSphere, Window Azure), Type 2 (Vmware Workstation), Physical Machine.

Problems Resolved by this Release

ELM 2.1.73 fixed the following defects:

Resolved Problem	Defect Code	Description
Windows 11 Compatibility Issue	DE13727	Fixed compatibility issues with Windows 11 25H2 or later.

New Features

ELM 2.1.73 makes various improvements in the following:
